

PRESSURE REDUCING VALVE

MODEL NO.- FT-LPRV-1001

TECHNICAL SPECIFICATION :

Series FT-LPRV-1001 Industrial regulators are designed for maximum combustion efficiency in gas installation. They maintain excellent down stream control and can accurately control down stream pressure up to 0.005 bar. (50mm water column) The outlet pressure is sensed below resilient diaphragm through external sense line. Valve is double seated for high flow capacity, Cage guided for stability and soft seated for bubble tight shut off.
